# **Mitochondrial dysfunction in oxidative stress**

On the impact of neuronal  $K_{Ca}$  channels & calcium signaling in neurodegeneration

**PhD thesis**

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on

Friday 8 December 2017 at 12:45 hours

by

**Birgit Honrath**

born on 4 September 1988  
in Bonn, Germany

**Supervisor**

Prof. M. Schmidt

**Co-supervisor**

Dr. A.M. Dolga

Dr. C. Culmsee

**Assessment Committee**

Prof. U.L.M. Eisel

Prof. G. Bultynck

Prof. S.A. Kushner

# **Mitochondrial dysfunction in oxidative stress**

**On the impact of neuronal  $K_{Ca}$  channels & calcium signaling in neurodegeneration**

Birgit Honrath

The research presented in this thesis was carried out at the Institute of Pharmacology and Clinical Pharmacy at the Philipps-Universität Marburg, Germany, and at the Department of Molecular Pharmacology at the University of Groningen, The Netherlands. This thesis was financially supported by the German Research Foundation (DO 1525/3-1), and by the Ubbo Emmius sandwich scholarship provided by the University of Groningen, The Netherlands.

Printing of the thesis was financially supported by the University Library of Groningen (University of Groningen), the Graduate School of Medical Sciences (GSMS, University of Groningen), and the Research School of Behavioural and Cognitive Neurosciences (BCN, University of Groningen).

## Table of contents

1	General introduction	1
2	Small conductance $\text{Ca}^{2+}$ -activated $\text{K}^{+}$ channels in the plasma membrane, mitochondria and the ER: pharmacology and implications in neuronal diseases <i>Neurochemistry International</i> , doi: 10.1016/j.neuint.2017.05.005	41
3	Small conductance $\text{Ca}^{2+}$ -activated $\text{K}^{+}$ (SK3) channels are regulated by miRNA-135a in epilepsy-like conditions	63
4	SK2 channels regulate mitochondrial respiration and mitochondrial calcium uptake <i>Cell Death &amp; Differentiation</i> , doi:10.1038/cdd.2017.2	87
5	Glucose-regulated protein 75 (GRP75) determines ER-mitochondrial coupling and sensitivity to oxidative stress in neuronal cells <i>Cell Death &amp; Discovery</i> , Article in Press	119
6	SK channels differentially affect neurotoxicity in conditions of enhanced ER-mitochondrial coupling	147
7	General discussion & main conclusions	175
	Nederlandse samenvatting	202
	German summary/Zusammenfassung	209
	Acknowledgements/Danksagung	215
	Curriculum vitae	224
	Publication list	225
